

# remoteproc/rpmsg Home

## About this project

Advance and promote development related to the remoteproc and rpmsg kernel subsystems. More specifically identify features commonly sought after by the [OpenAMP](#) community and assist with their implementation.

## Get Involved

- [Meetings/Calls](#)
- Join the [remoteproc-dev ML \(archives\)](#)
- [IRC](#)

## Meetings

(Edit the team calendar macro and crate a project calendar then populate it with the project public calls)
