

# Linaro's OP-TEE Contributions Home

## About this project

OP-TEE is an open source TEE that has been well received by SoC vendors and OEMs and has been deployed in mobile phones, tablets, cameras, set-top boxes etc. On this project page you will find what Linaro plans to work with when it comes to OP-TEE.

Linaro used to own the OP-TEE project, but in September 2019 the ownership was transferred to the [TrustedFirmware.org](https://www.trustedfirmware.org) project. Despite that Linaro still continues to contribute to the OP-TEE project just as before, the only difference is that Linaro should from now on be seen as any other contributor to the OP-TEE project. To try to avoid confusion with OP-TEE at [TrustedFirmware.org](https://www.trustedfirmware.org), we've named our project "Linaro OP-TEE contributions".

This means that Linaro makes an internal roadmap for OP-TEE, a roadmap that is in sync with the members of Linaro as well as with the [TrustedFirmware.org](https://www.trustedfirmware.org) project.

## Get Involved

- Mailing List - [op-tee@lists.trustedfirmware.org](mailto:op-tee@lists.trustedfirmware.org)
- Subscription Link - Join the conversation at <https://lists.trustedfirmware.org/mailman/listinfo/op-tee>
- Meeting/Calls - Once a month an email thread will be started at <https://lists.trustedfirmware.org/mailman/listinfo/op-tee> where we gather topics to discuss. No topics == no meeting. All information such as connection details will be found in the email thread. So, for people interested we encourage you to subscribe to that mailinglist.

## Meetings

The following items are on the project backlog but not currently planned. If you are interested in contributing to any of these items, please state your intention on the project's mailing list (found above)

Key	Summary	T	Assignee	Status	Resolution
-----	---------	---	----------	--------	------------

No issues found

Documentation is found on the OP-TEE website at : <https://optee.readthedocs.io/en/latest/>
